Education

Stevens Institute of Technology
B.S. in Computer Science
Hoboken, NJ | Expected May 2020
Honors: Dean's List, Presidential Scholar,
Pinnacle Scholar, CHI Scholar

Skills

Python, Java, JS, C++, C, Erlang, OCaml, Git, Bash, Unix, SQL,
MongoDB, Node, Express, Flask, Scikit-learn, Agile Methods, Project
Management, Documentation and Technical Writing, System
Administration

Organizations

WCPR, Castle Point Radio
General Manager, Sysadmin | Stevens
Institute of Technology
Mar 2017 - Present

Media Subcommittee
Representative | Stevens Institute of
Technology
Mar 2017 - Present

Projects

HungerLog | Hunger Tracking Android Application
Allowed users to log hunger level, associated emotions, and meal
pictures before and after eating. Automatically exported these logs
to CSVs to facilitate data analysis. Developed Summer 2018.

Market Moods | Stock Prediction Web Application
Provided suggestions on whether to make investments based on
textual sentiment analysis of recent news articles sourced from the
New York Times Article Search API. Flask-based and Bootstrap-
styled. Developed Summer 2019.

Experience

Stevens Institute of Technology | Course Assistant
Hoboken, NJ | Aug 2018 - Present

- Assisted in the following courses: Intro to Computer Science, Fall 2018, Data Structures, Spring 2019, and Concurrent Programming, Fall 2019
- Graded assignments, quizzes, and exams
- Administered lab and recitation periods
- Held weekly office hours, assisting students with assignments, concepts, and programming
- Assisted in course planning and the creation of assignments and exams

Deutsche Bank | Technology Analyst Intern

New York, NY | Jun 2019 - Aug 2019

- Worked as part of a team developing software that created real-time risk reports for equities traders
- Built tools used to automate the addition of new credit default swap indices into eTrading databases
- Created POC for integration of open source streaming libraries into high data volume financial applications
- Developed full stack of web application used to predict stock performance using sentiment analysis of news articles
- Wrote unit tests that were used as part of a continuous integration system

Health and AI Lab | Undergraduate Research Assistant

Hoboken, NJ | Jun 2018 - May 2019

- Assisted in research under Professor Samantha Kleinberg involving Machine Learning and Bioinformatics
- Designed and ran pilot research experiment
- Created an Android application to facilitate data logging by trial participants
- Worked with wearable devices to read and interpret biometric data
- Used machine learning tools to develop algorithmic hunger prediction model
